

## CHECKLIST OF VASCULAR PLANTS OF BONNER AND BOUNDARY COUNTIES, IDAHO

compiled by  
Marian J. Fuller, Ph.D in Botany

This checklist of Bonner and Boundary counties contains 1382 vascular plant taxa belonging to 109 families and to 460 genera. The families are arranged phylogenetically, not alphabetically. Alphabetical indices of the families and genera are provided. The genera are arranged alphabetically within the each family, and species are arranged alphabetically within the genus.

Additional sources and their acronyms:

- (BLM) = McFarlane, S, Kuhman T. and Johnson, C. 2002. Field Guide to Special Status Plants of the Cottonwood Field Office.  
 (FPNW) = Hitchcock, C. L. and Cronquist, A. 1973. Flora of the Pacific Northwest.  
 (PRM) = Kershaw L., A, MacKinnon and J. Pojar; Mousseaux, M.R. 1998. Plants of the Rocky Mountains.  
 (IFG) = Idaho Fish and Game (in house document on plants of three recently acquired wetlands)  
 (IPNF-RPFG) = Mousseaux, M.R. Idaho Panhandle National Forests--Rare Plant Field Guide (original and revised editions).  
 (IPNF-) = Idaho Panhandle National Forests (in house document including K = Kaniksu, P = Priest Lake .  
 (UIH) = University of Idaho Herbarium, Moscow.  
 (USDA) = [plants.usda.gov/classification](http://plants.usda.gov/classification)

Abbreviations: Br = Bonner County; By = Boundary County; Br and By = collected by MJF; Br and By = collected or notated by others. See additional sources  
 \* = exotic taxon    Ida? = maybe first record for Bonner and/or Boundary Counties, many not in FPNW.

Explanation of the Components of a Checklist Entry:

*Maianthemum*<sup>1</sup> *racemosum*<sup>2</sup> (L.)<sup>3</sup> Link<sup>4</sup> ssp.<sup>5</sup> *amplexicaule*<sup>6</sup> (Nutt.)<sup>7</sup> LaFrankie<sup>8</sup> WESTERN SOLOMON'S-SEAL<sup>9</sup> <sup>10</sup>[*Smilacina*<sup>11</sup> *r.*<sup>12</sup> var.<sup>13</sup> a.<sup>14</sup>] Br;By<sup>15</sup>

<sup>1</sup>generic name; <sup>2</sup>specific epithet; <sup>3</sup>abbreviation for Linnaeus, author of specific epithet; <sup>1,2,3</sup>scientific name; <sup>4</sup>author of "new" species combination; <sup>5</sup>abbreviation for subspecies; <sup>6</sup>subspecific epithet; <sup>7</sup>abbreviation for Nuttall, author of subspecific epithet; <sup>8</sup>author of the entire "new" entry; <sup>9</sup>a common name; <sup>10</sup>the synonym used in the FPNW (see synonymy); <sup>11</sup>"old" generic name; <sup>12</sup>abbreviation for specific epithet; <sup>13</sup>abbreviation for variety; <sup>14</sup>abbreviation for variety; <sup>15</sup>collected in both Bonner and Boundary Counties by MJF.

**Synonymy:** in this checklist, the synonyms used in the Flora of the Pacific Northwest have been placed within brackets, [ ]'s.

Many genera have been split. For example, the genus *Aster* has been split into several genera, including *Canadanthus*, *Eucephalus*, *Ionactis*, and *Symphotrichum*. Sometimes, a species has been determined to be a subspecies or variety of an "older" species. Frequently, a subspecies or variety has been deemed distinct enough to be elevated to the species level.

**Dedication:** to Blue III, Azure and Blue IV, my friends and faithful companions during the thirty years of this project. I was never alone. They probably thought "picking posies" was crazy, but they put up with all my idiosyncrasies. They are my beloved "hearing-ear" dogs.

## INDEX OF FAMILIES

Two families, Loranthaceae and Nymphaeaceae, have been split. The genus, *Arceuthobium*, of “old family”, Loranthaceae, has been placed in the “new family” Viscaceae. The genus, *Brasenia*, of the “old family”, Nymphaeaceae, has been placed in the “new family” Cabombaceae.
