Treasured Landscapes Recreation Project

Dan Gilfillan, Project Leader
Sandpoint Ranger District
Idaho Panhandle National Forest

The Kinnikinnick Native Plant Society thanks you for your work on the Treasured Landscapes Recreation Project and wishes to express its support for the proposed actions. Many will add protections for sensitive native plants as recreation increases. We especially appreciate protecting fens, wetlands and riparian areas from trampling and erosion.

The botanic field work done so far having to do with rare plants is excellent and the weed control already undertaken as part of this project has shown outstanding results. With any project, preventing the spread of weeds is a concern. We specifically ask that weed control and monitoring be ongoing in this very special landscape.

Please keep us on the list for this project.

Sincerely,

Molly O'Reilly

Chair, Conservation Committee
